Education

VIT Bhopal University — Bhopal, MP
B.Tech in Computer Science Engineering — *July 2023 – May 2027*

Technical Skills

Languages: C++, Java, Python, JavaScript, TypeScript, SQL

Frontend Development: React.js, Next.js, Tailwind CSS

Backend Development: Node.js, Express.js, REST API Design, WebSockets (Socket.io)

Database & Caching: MongoDB, MySQL, PostgreSQL, Redis

Authentication & Authorization: JWT, Firebase Authentication, Passport.js , RBAC

Tools & Platforms: Git, GitHub, Docker, Postman, Vercel, Render

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Projects

Rent-a-Ride — October 2026
GitHub | Live Demo

- *Next.js, Node.js, Express.js, MongoDB, Firebase Authentication*
- Engineered a full-stack car rental platform supporting vehicle discovery, advanced filtering, date-based reservations, and booking management.
- Integrated Firebase Authentication with email/password and Google Sign-In, securing application routes and user sessions.
- Implemented role-based authorization for users, vendors, and administrators with server-side permission validation.
- Developed RESTful APIs for vehicle management, booking availability validation, and reservation-status tracking using Node.js, Express.js, and MongoDB.

Last-Mile Delivery & Logistics Platform — August 2026
GitHub | Live Demo

- *React.js, Node.js, Express.js, MongoDB, Leaflet, OSRM, JWT, Groq AI*
- Engineered a multi-role logistics platform supporting customer, delivery-agent, and admin workflows for shipment tracking and fleet management.
- Implemented automated driver assignment using the Haversine distance algorithm and capacity-based availability checks.
- Developed a dynamic freight-pricing engine using volumetric weight, zone-based rate slabs, and cash-on-delivery (COD) surcharges.
- Integrated Leaflet and OSRM for route planning and Groq LLaMA 3.3 for AI-assisted ETA estimation, delivery-risk assessment, and address correction.

MediSync — Smart Hospital Management System — July 2026
GitHub | Live Demo

- *React.js, Node.js, Express.js, MongoDB, Socket.io, JWT, Gemini API, Electron.js*
- Engineered a full-stack hospital management system supporting appointments, electronic medical records, prescriptions, laboratory, pharmacy, and billing workflows.
- Implemented JWT-based authentication and role-based access control (RBAC) for six user roles, enforcing access to protected resources.
- Integrated Socket.io for real-time appointment queue synchronization across connected dashboards without manual refreshes.
- Integrated Google Gemini API for AI-assisted healthcare interactions and Electron.js for desktop application support.

Achievements

Solved 270+ Data Structures and Algorithms problems on LeetCode

Certifications

Full Stack Web Development — Apna College

Advanced Soft Engineering and AI Foundation — MP Online Limited
